POMME	

Safety Data Sheet

According to Annex II to REACH - Regulation (EU) 2020/878

SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Code: 088L500/P

Product name POMME

UFI : PGY0-M0J8-H007-GM1J

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use AIR FRAGRANCES

Identified Uses	Industrial	Professional	Consumer
Professionale	-	✓	-

1.3. Details of the supplier of the safety data sheet

Name SEPCA S.r.L.

Full address Via Guido Rossa nm. 13

District and Country 42023 CADELBOSCO SOPRA (RE)
Italia

Tel. 0522/911000

Fax 0522/911081

e-mail address of the competent person responsible for the Safety Data Sheet Supplier: sepca@sepca.it
sepca@sepca.it

1.4. Emergency telephone number

For urgent inquiries refer to

Centro antiveleni - Osp. Niguarda Ca' Granda - Milano - 02 66101029

Centro antiveleni - Centro Nazionale di Informazione Tossicologica - Pavia - 0382 24444

SECTION 2. Hazards identification

2.1. Classification of the substance or mixture

The product is not classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP).
However, since the product contains hazardous substances in concentrations such as to be declared in section no. 3, it requires a safety data sheet with appropriate information, compliant to (EU) Regulation 2020/878.

Safety Data Sheet According to Annex II to REACH - Regulation (EU) 2020/878		
REACH Reg. 01-2119474016-42 The full wording of hazard (H) phrases is given in section 16 of the sheet. SECTION 4. First aid measures 4.1. Description of first aid measures No effects requiring implementation of special first aid measures are expected. The following information represents practical indications of correct behaviour in the event of contact with a chemical product, even if not hazardous. In case of doubt or in the presence of symptoms contact a doctor and show him this document. In case of more severe symptoms, ask for immediate medical aid. EYES: Remove, if present, contact lenses if the situation allows you to do so easily. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. Get medical advice/attention. SKIN: Take off contaminated clothing. Wash immediately and thoroughly with running water (and soap if possible). Get medical advice. Avoid further contact with contaminated clothing. INGESTION: Do not induce vomiting unless explicitly authorised by a doctor. Do not give anything by mouth to an unconscious person. Get medical advice/attention. INHALATION: Remove victim to fresh air, away from the accident scene. Get medical advice/attention. Rescuer protection It is good practice for rescuers lending support to a person who has been exposed to a chemical substance or to a mixture to wear personal protective equipment. The nature of such protection depends on the hazard level of the substance or mixture, on the type of exposure and on the extent of the contamination. In the absence of other more specific indications, use of disposable gloves in the event of possible contact with body fluids is recommended. For the type of PPE suitable for the characteristics of the substance or mixture, see section 8. 4.2. Most important symptoms and effects, both acute and delayed Specific information on symptoms and effects caused by the product are unknown. DELAYED EFFECTS: Based on the information currently available, there are no known cases of delayed effects following exposure to this product. 4.3. Indication of any immediate medical attention and special treatment needed If symptoms occur, whether acute or delayed, consult a doctor. Means to have available in the workplace for specific and immediate treatment Running water for skin and eye wash. SECTION 5. Firefighting measures 5.1. Extinguishing media SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular. 5.2. Special hazards arising from the substance or mixture HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE		

 Dove solo l'acqua non basta		Revision nr. 1
POMME		Dated 14/03/2025 First compilation Printed on 17/02/2026 Page n. 4/12
Safety Data Sheet According to Annex II to REACH - Regulation (EU) 2020/878		
Do not breathe combustion products. 5.3. Advice for firefighters GENERAL INFORMATION Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations. SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137). SECTION 6. Accidental release measures 6.1. Personal precautions, protective equipment and emergency procedures Block the leakage if there is no hazard. Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures. 6.2. Environmental precautions The product must not penetrate into the sewer system or come into contact with surface water or ground water. 6.3. Methods and material for containment and cleaning up Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13. 6.4. Reference to other sections Any information on personal protection and disposal is given in sections 8 and 13. SECTION 7. Handling and storage 7.1. Precautions for safe handling Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat. 7.2. Conditions for safe storage, including any incompatibilities Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details. 7.3. Specific end use(s) Information not available SECTION 8. Exposure controls/personal protection		

 Dove solo l'acqua non basta		Revision nr. 1
POMME		Dated 14/03/2025 First compilation Printed on 17/02/2026 Page n. 5/12
Safety Data Sheet According to Annex II to REACH - Regulation (EU) 2020/878		
8.1. Control parameters Information not available 8.2. Exposure controls As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. HAND PROTECTION Protect hands with category III work gloves. The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, permeability time. The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use. SKIN PROTECTION Wear category I professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing. EYE PROTECTION Wear airtight protective goggles (see standard EN ISO 16321). RESPIRATORY PROTECTION Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. Use a mask with a type A filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529. ENVIRONMENTAL EXPOSURE CONTROLS The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.		
SECTION 9. Physical and chemical properties		
9.1. Information on basic physical and chemical properties		
Properties	Value	Information
Appearance	liquid	
Colour	straw yellow	
Odour	MELA	
Melting point / freezing point	not available	
Initial boiling point	not available	
Flammability	not available	
Lower explosive limit	not available	
Upper explosive limit	not available	
Flash point	not available

Auto-ignition temperature not available Decomposition temperature not available pH 7 Kinematic viscosity not available Solubility miscible Partition coefficient: n-octanol/water not available Vapour pressure not available Density and/or relative density 1 Relative vapour density not available Particle characteristics not applicable		
9.2. Other information 9.2.1. Information with regard to physical hazard classes Information not available 9.2.2. Other safety characteristics Information not available		
SECTION 10. Stability and reactivity		
10.1. Reactivity There are no particular risks of reaction with other substances in normal conditions of use.		
10.2. Chemical stability The product is stable in normal conditions of use and storage.		
10.3. Possibility of hazardous reactions No hazardous reactions are foreseeable in normal conditions of use and storage.		
10.4. Conditions to avoid None in particular. However the usual precautions used for chemical products should be respected.		
10.5. Incompatible materials Information not available		
10.6. Hazardous decomposition products Information not available

SECTION 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.
It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Information not available

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Information not available

Interactive effects

Information not available

ACUTE TOXICITY

ATE (Inhalation) of the mixture:	Not classified (no significant component)
ATE (Oral) of the mixture:	Not classified (no significant component)
ATE (Dermal) of the mixture:	Not classified (no significant component)

SKIN CORROSION / IRRITATION

Does not meet the classification criteria for this hazard class

SERIOUS EYE DAMAGE / IRRITATION

Does not meet the classification criteria for this hazard class

RESPIRATORY OR SKIN SENSITISATION

Does not meet the classification criteria for this hazard class

GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

CARCINOGENICITY

Does not meet the classification criteria for this hazard class

REPRODUCTIVE TOXICITY
